

From Shaw's Lab to Multidisciplinary Research

A symposium dedicated to Professor PC Shaw on his 60th Birthday

22 June 2018, Lecture Theatre L1, Science Centre, CUHK
9:00 am – 12:30 pm

Speakers and Schedule

From bacterial restriction enzymes at CUHK to structure of chaperone-translocator complex in bacterial Type III secretion system at NUS

Henry Y.K. Mok, Department of Biological Sciences, National University of Singapore

How I got hooked in structural biology – from Trichosanthin to urease maturation

Kam-Bo Wong, School of Life Sciences, The Chinese University of Hong Kong

From microorganism to human reproduction: Roles of gems in our bodies

Calvin K.F. Lee, Department of Obstetrics & Gynaecology, University of Hong Kong

314 – 294 : My 20-year Journey in Neuroscience

Kwok-Fai Lau, School of Life Sciences, The Chinese University of Hong Kong

From antigen determinants of Trichosanthin to the study of Parkinson's disease

Kenny K.K. Chung, Division of Life Science, Hong Kong University of Science and Technology

Investigating human neurological diseases: from pathogenic mechanisms to treatment strategies

Edwin H.Y. Chan, School of Life Sciences, The Chinese University of Hong Kong

Drug discovery from natural and structurally modified bufadienolides

Ren-Wang Jiang, College of Pharmacy, Jinan University

Investigation of effect mechanisms and clinical trial of polysaccharide of *Dendrobium officinale* in alleviating cigarette-induced pulmonary inflammation

Yanbo Zhang, School of Chinese Medicine, University of Hong Kong

ALL ARE WELCOME

ORGANIZED BY:

School of Life Sciences
The Chinese University of Hong Kong

SPONSOR:

Chung Chi College
The Chinese University of Hong Kong
