

THE CHINESE UNIVERSITY OF HONG KONG
SCHOOL OF LIFE SCIENCES

LIFE SCIENCES SEMINAR SERIES 2012 - 2013

Life Sciences Seminar is a seminar series aiming to provide up-to-date research ideas and experimental approaches to graduate students in the School

Polyglutamine Diseases: From basic research to therapeutic development

by

Dr. Tsoi Ho
School of Life Sciences
The Chinese University of Hong Kong

Dr. Tsoi attended The Chinese University of Hong Kong as an undergraduate. After obtaining his B.S. in 2008, he continued his study and in 2012 he obtained his Ph.D. from in CUHK. He is now doing his post-doctoral research in CUHK. Dr Tsoi's research interests are in mechanisms of human neurodegenerative diseases including Polyglutamine diseases and development of potential therapeutic agents.
